

To manually install MAD 4 Mach, do this:

In the “Install” zip folder that you downloaded and unzipped you will see the following files and/or folders.

NOTE: MDL = MyDriveLetter is the Drive you installed Mach4Hobby under,
i.e. C:\Mach4Hobby would be: MDL:\Mach4Hobby

Folders:

- “MachMAD” copy and paste this entire folder to:
MDL:\Mach4Hobby\Profiles
So it’s path would now look like this:
MDL:\Mach4Hobby\Profiles\MachMAD.
- “MADresources” copy and paste this entire folder to:
MDL:\Mach4Hobby\Wizards
So it’s path would now look like this:
MDL:\Mach4Hobby\Wizards\MADresources

Files:

- “MAD.mcc” copy and paste this entire file to:
MDL:\Mach4Hobby\Wizards
So it’s path would now look like this:
MDL:\Mach4Hobby\Wizards\MAD.mcc
- “MadLauncher.mcs” copy and paste this entire file to:
MDL:\Mach4Hobby\Wizards
So it’s path would now look like this:
MDL:\Mach4Hobby\Wizards\MadLauncher.mcs
- “wxMachMAD.set” copy and paste this entire file to:
MDL:\Mach4Hobby\Screens
So it’s path would now look like this:
MDL:\Mach4Hobby\Screens\wxMachMAD.set

Then, read the read me, and user’s manual in the downloaded/unzipped install folder for instructions, on how to use it.

Have fun!
