

Encorer used: ElCheapo with switch
 Nowadays used with Arduinos
 If dedicated MPG encoder is used it should be
 powered from external supply or if LPT port
 can provide enough current from pin1 so
 no external supply is needed.

THIS IS MY PERSONAL CONFIGURATION

SelX OEMTrigger#4, Active LOW
 SelY OEMTrigger#5, Active LOW
 SelZ OEMTrigger#6, Active LOW
 EncSW OEMTrigger#7, Active LOW
 X1 OEMTrigger#8, Active LOW
 X10 OEMTrigger#9, Active LOW
 X100 OEMTrigger#10, Active LOW
