

READ ME 1st!!!

To install MAD 4 Mach:

WARNING!!! This installer will over-write any “old” or previous instances of MAD, to include: Basically, if you have made any changes to the “Stock” MAD, and you want to save that, then you will need to rename the file names that you changed, to something else prior to running the MAD installer!

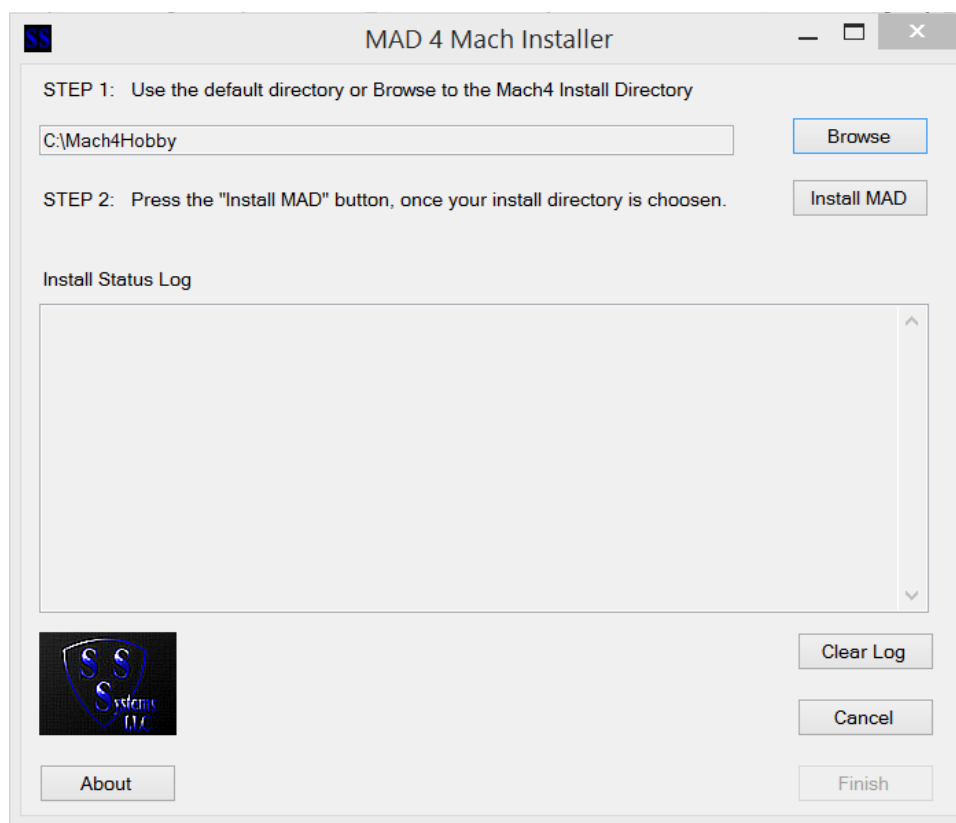

1. Open the folder called “MAD4Mach Install” where ever you unzipped it to, i.e. the desktop.
2. Inside that folder you will see a exe called: MAD4installer.exe, double click it.
3. You will see the license agreement screen, if you agree press Yes.

4. If you press No, it will return you to the installer dialog, just hit the cancel button or red X to close it.

(Continued next page)

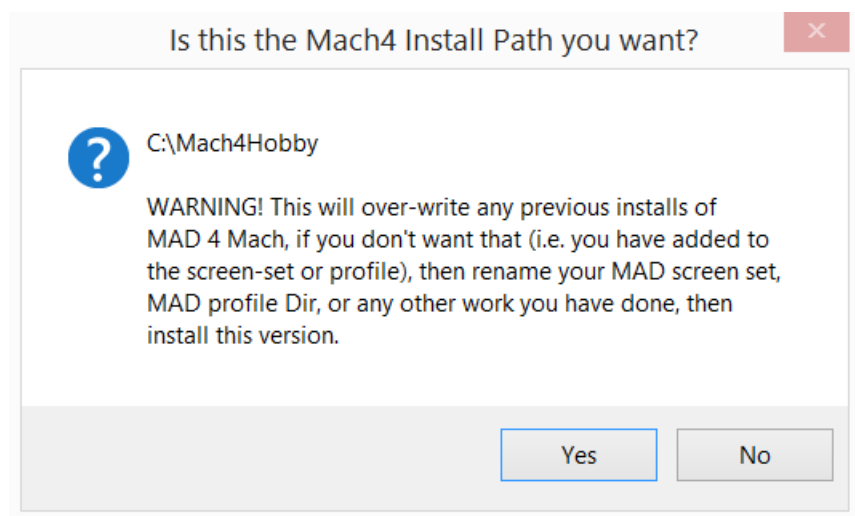

5. If you have pressed yes, you will see:

Step 1: Pick the Mach4 main install directory path, it defaults to “C:\Mach4Hobby”, if yours is different use the “Browse” button to browse to the directory you installed your “Mach4Hobby” in.

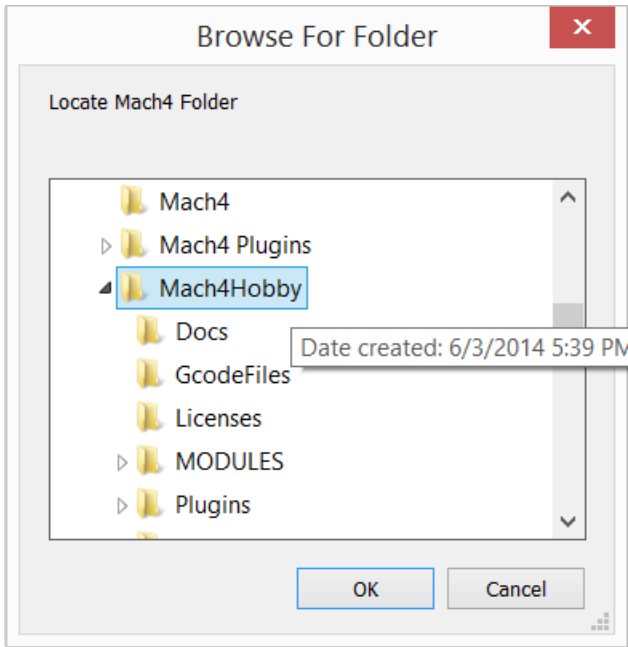

Step 2: Once the directory is chosen, press the “Install MAD” button.

6. When you press the “Install MAD” button, you will see this, plus an overwrite warning:

(Continued next page)

7. If this is the NOT the correct Install Directory, press “No”, and you will see the browse dialog pop up (same as if you pushed the browse button):

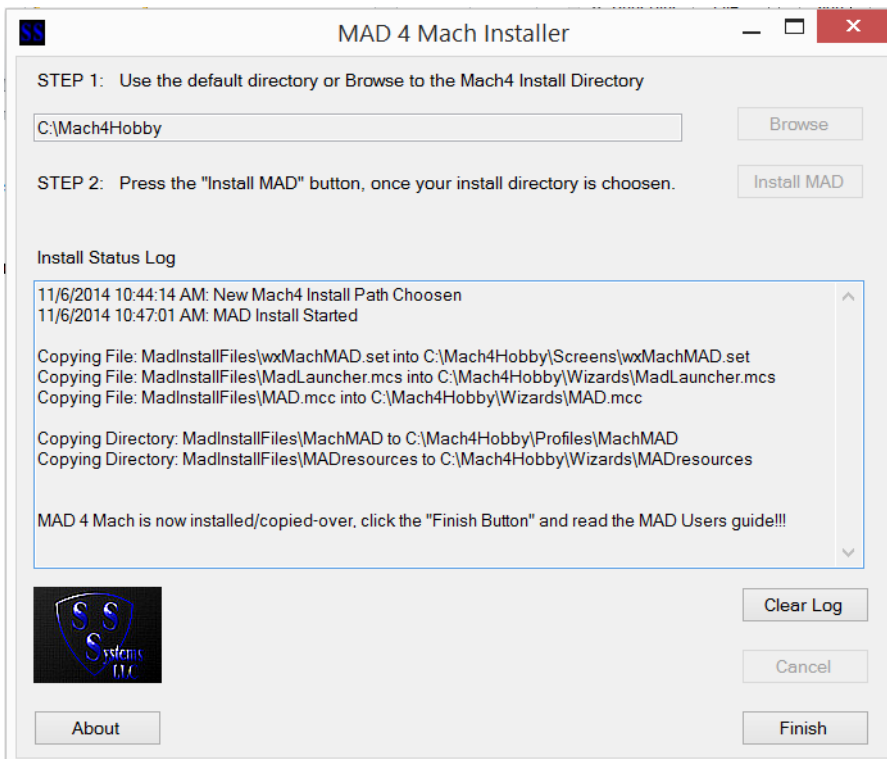

8. The directory you pick here will also show up in the install status log window.

9. Press the “Install MAD” button again, (if you had to change the install directory).

10. The “Is this the Mach4 install path you want?” dialog box will appear again, this time since you have browsed to the correct install directory, press “Yes”.

11. It will install, (copy over) from the install folder to the correct places in the Mach4Hobby application tree. You will then see this:

12. It shows all the files and directories that have been copied over, and where to. The “Finish” button, It becomes Enabled, so push it and the dialog will close.
13. Note: If you push the “About” button, or click on my company logo, it will take you to my webpage.
14. READ THE: “MAD 4 Mach Users Manual.pdf”!!!! It has information on operation, and customizing for your screen set(s), you might want to know!!
