How to install the license for Mach3:

Your license file will arrive via email attached within a zip file. The name of the zip file will be the order number of your purchase. Once you open the email, save the attached zip file to your Desktop (or a thumb drive if installing on a PC not connected to the internet). To do this, right-click the attachment and click Save As from the menu:

Hello	
Thank you for your licen 🖶 Quick Print	Zip file that contains your license files, organized by product and then by the license names
hat you supplied. The fo 🗖 🔊	to the license name that you provided and contain the license that is coded with the
corresponding name. Any	and be able to open the attached file.
Once unzipped, please do 🗐 Save All Attachm	ne <u>nts</u> hse files, as they are encrypted and will only appear as gibberish. To load, simply copy
hem into your Mach3 ins 🗙 Remove Attachn	by default). If you purchased a LazyCam and/or Mach3 license, you may check that they
are installed correctly by	ection on the menu when the program is loaded.
f you are having trouble 🗈 Copy	alled, please use the forum or email us at <u>support@machsupport.com</u> . If your license file i
nstalled correctly and do ER Colort All	us at license@machsupport.com and we will assist you with the problem.
DF files of the Mach3 m	w.machsupport.com.
1e Yahoo Mach1Mach2CNC web group, as ideos, a Wiki that shows customization pro- ideos on setup of the program, and show W technical support is done via the Forums	well as from the Forums on the main website. Also available on the website are several tutorial ocedures, and several other resources that can help with any questions you may have. There are sample usage in many areas.
he forum first, to see if you particular issu	the has been previously discussed, and feel free to nost a new tonic if it hasn't.
t is assumed that you have already downly	paded, installed, and configured Mach3 before purchasing a Mach3 license. If you have not,
owever, you can find the software on the	a Downloads page at www.machsupport.com. It is recommended that you use the current version of

Choose the location to save the file to. In this example, we are saving it to the Desktop:

🕽 🕞 🗢 💻 Desktop 🔸	✓ 49 Search Desktop		\$
Organize 🔻 New folder	18 687.	E= •	Ø
 Microsoft Outlook Favorites Desktop Downloate Downloate Downloate Admin System Folder Admin System Folder Atmin Atmin System Folder Atmin Atmin Atmin System Folder Atmin System Folder Atmin Atmin	Homegroup System Folder Computer System Folder		
File name: Order Number.zip			ŝ
Save as type: [WinRAR ZIP archive (* zip)			-

Once the location is selected, click Save:

Go to the location on your computer that you saved the file to, right-click the zip file, then select Extract to, Extract All, Unzip, etc (the actual term will vary depending on the file compression utility you use). The first example is what it will look like if using WinRAR and the second is what Windows native file compression utility will look like:

Once you have extracted the contents of the zip file, a standard folder will appear at the selected location. Click it to open it:

Once the folder is open, you will see another folder (or folders) with the name of the product(s) you purchased a license for. Each product will have its own folder (if you bought more than one product license). This example shows what it would look like if you bought a license for Mach3 and the Mach3 Addons (wizards). Click on the product name folder to open it:

💭 🕫 🚺 🔹 Order Numb	er 🕨			• \$g	Search Order Nurr	iber

Now that you have the license file copied to the clipboard, you need to browse to your Mach3 installation directory. The default location is <u>C:\Mach3</u> (if you installed it elsewhere then you will need to adjust accordingly in the following steps). You can get to it by clicking on the Start button then clicking Computer in the right-hand column:

Once you have Computer open, open the C: drive:

With your C: drive open, you should see the Mach3 folder - open it:

Computer	► Local Disk (C:) ►		• • • • · · · · · · · · · · · · · · · ·	earch Local Disk	: (C;)	
Organize 👻 🔚 Open	Include in library 👻 Share with 💌 Burn	New folder			825 💌
